WE GUARANTEE

Maloney's nursery stock to be best quality, true to variety name, and safely delivered. It is explicitly understood that if you are not satisfied, we will return the purchase price or replace it with other stock providing you report to carrier immediately or to us.

Amur River Privet

Very hardy and dense, recommended for planting where winters are extremely severe.

For the low or medium low hedge, there is nothing quite so fine as Japanese Barberry and Privet. In the far north, where

winters are severe, the Amur Privet is best to use. If you want a taller screen or background hedge, we recommend the Spirea Van Houttei or Tartarian Honeysuckle. If you are looking for an Evergreen hedge, there is nothing quite like the Norway Spruce, American Arbor-Vitae and Siberian Arbor-Vitae.

CERTIFIED

Every shipment contains a certificate from the State Nursery Inspector, stating that it is in fine healthy condition and free from disease.
